.NET DEVELOPER

I am an experienced .NET / C# / Database developer specializing in developing applications and delivering solutions with Microsoft technology stack. In my career I have developed many applications supporting and improving enterprise productivity.

SKILLS

- ✓ C#
- ✓ ASP.NET MVC
- ✓ Web API, REST
- ✓ .NET Core
- ✓ Entity Framework
- ✓ T-SQL/LINQ
- ✓ SQL Server
- ✓ MongoDB
- ✓ MySQL
- ✓ JavaScript
- ✓ HTML
- ✓ CSS
- ✓ jQuery, Bootstrap
- ✓ Git
- ✓ Visual Studio
- ✓ Crystal Reports
- ✓ DTS/SSIS

EXPERIENCE

.NET DEVELOPER

DNC STUDIO – Maciej Szymański

2011 – PRESENT

RESPONSIBILITIES

- I work with clients to deliver solutions and develop applications supporting business operations,
- prepare and process data for financial and economic analysis,
- monitor and support database systems and applications,
- provide advice (consultancy) in areas of application development and software projects implementation.

HIGHLIGHTS

- I prepared and took part in the planning and implementation of an ERP system (Comarch ERP XL) at a client site,
- built applications and integrations supporting business processes and expanding functionality in various ERP systems,
- built application for multistage management of client complaint process with integration with ERP system,
- built reporting and analytical platform, with CRM module for regional sales representatives,
- built applications integrating client ERP systems with popular sales platforms (Allegro and eBay),
- built multiple applications for data manipulation and transfer between various accounting systems.

.NET DEVELOPER

PW OPTIMAL – Marian Wiszniewski

2003 – 2011

RESPONSIBILITIES

- I was responsible for creating software supporting operational processes of the company,
- creating, maintaining and developing databases and manipulating and processing of data for the application development and enterprise reporting.

HIGHLIGHTS

- I prepared and took part in the planning and implementation of an ERP system (GreatPlains / Microsoft Dynamics GP),
- built reporting module and designed multiple analytical reports for GreatPlains ERP system,
- built several integrations and add-ons that improved functionality and adapted GreatPlains ERP system for user needs,
- built a simple inventory system for pallet storage management,
- built multiple applications for sales and inventory quantitative/statistical analysis,
- built application for managing customer queries for out-of-stock or non-inventory/special fulfilment items with corresponding supplier queries.

 EXPERIENCE, CONT.

DATABASE ANALYST PW OPTIMAL – Marian Wiszniewski 2001 – 2003

RESPONSIBILITIES

- I was responsible for creating, maintaining and development of database solutions, manipulating, cleansing and processing data, as well as presenting data,
- preparing ad hoc analyses and reports for operational needs of enterprise departments and management,
- designing and preparing financial and economic analyses and reports based on existing data from multiple sales and inventory systems.

HIGHLIGHTS

- I designed and developed an Intranet platform for sales and inventory analysis, for operational needs of enterprise departments.

 EDUCATION

UNIVERSITY OF SZCZECIN 1996 – 2001
THE FACULTY OF ECONOMIC SCIENCES AND MANAGEMENT, BACHELORS DEGREE
